Car Wash

"At Wallace Recycling we don't take any chances on our IT. Our business is the collection of waste and recycling from all over the Midlands - we are not computer experts. However in order to deliver our top-notch customer service it is imperative that our IT systems work seamlessly. Particularly when it comes to back-ups and data security. Paul Connolly's perfectionist approach is invaluable in this regard. Avantec are a wholly trustworthy, competent and professional outfit who react fast to any emergency, even outside of normal office hours. We're very happy with their performance."

Tom Griffith
Credit Control Manager
